

JEANNEAU 57 - 2014 NANUK

LAYOUT OPTIONS:

There are flexible sleeping arrangements, both forward and aft, giving NANUK the ability to sleep up to 12 people in many combinations. The most popular layout is 8 people in 4 cabins with 4 heads/showers plus a double bunk crew cabin forward with their own head/shower.

The forward two cabins have a removable bulkhead (if desired), allowing for conversion to one larger owner's suite, or for family situations; a two-bedroom 'apartment' with two heads.

Two large double cabins are located aft, each with their own head and shower. These double cabins can be configured either as a Queen or as two single beds with standing headroom between each bed.

The Captain's cabin forward has a separate entry from the deck and features a double bunk and private head and shower.

MANGO YACHT CHARTERS
